ABOUT THE AUTHOR 53

Introduction

The origin of roulette is not very clear. Whilst historians cannot agree on the origins of the game, many believe it was originally invented by the Chinese, and brought into Europe by Dominican Monks who were trading with the Chinese. The French however, mainly believe it was invented by Blaise Pascal, a 17th Century French mathematician. The word "roulette" is derived from a French word meaning a small wheel.

The roulette wheel was made popular during the late 18th century when the ruler of Monaco at the time, Prince Charles, introduced gambling to Monaco to aid with the region's economic growth.

In 1842, two Frenchmen, Francois and Louis Blanc, invented the single "0" roulette game. This is the European roulette wheel of today. Although this version found its way to America, it was not accepted there, as the casinos favoured the two zero (00) wheel for its higher casino edge.

The advent of the internet allowed the game to flourish online, and today there are thousands of online casinos making it easy for everyone to have access to the game.

In this, the Sequel to *How to Win at Online Roulette*, we will cover a system by which you will be able to make a living out of playing online roulette daily. Whether you want to make \$100, \$250, \$1,000 or \$10,000 a day, this book will show you how you can achieve this through a simple system for making consistent daily profits from investing on roulette at online Casinos.

Chapter 1

The prerequisites

The Prerequisites

Welcome to the sequel to the successful online roulette book, *How to win at online roulette*. In the prequel, we covered several basic techniques that could be used to make wins at online casinos. The systems in that book were meant as a starting guide to this, the *Ultimate Online Roulette System*.

Before we get into the techniques, let us first analyse your financial position.

You are advised to apply an asset allocation policy to all your investments. The scope of this book is not broad enough to go into depth about asset allocation; therefore, you are advised to acquire the book *Asset Allocation: the Key to Financial Success*. This book will guide you through the asset allocation policy determination, application, and maintenance process.

To grow in profits you have to apply a regular profit taking policy, and reallocate investment returns into different investment risk levels. Online roulette belongs to the Momentum, or high-risk investment category or group. This momentum group is highly volatile. At no time must you invest more than 20% of your investment funds in this group.

Spread betting, greyhound and horse race betting and all other sports betting, poker, roulette, and all other gambling games and sports belong in this investment group. Options, Futures, and High Yield Investments Programs (HYIP) and investments also belong in this high-risk group.

Because of the high-risk nature of this investment group, it is advised that you do not use funds you cannot afford to lose. If you do not follow the rules in this book, or if you are unable to apply greed management effectively to your momentum investments, you will certainly lose.

Ultimate Online Roulette System

It is therefore important that you not only learn the techniques and system in this book, but also learn greed management, and follow the rules to guarantee you consistent wins. We shall cover methods for managing your greed after covering the rules of the system.

Your online roulette success tools

Before you begin, you will need access to a computer with internet access. The following is a list of software that you are advised to acquire in order to secure your roulette transactions over the internet:

1. Antivirus software (Panda, Apple, AVG, Symantec, McAfee, F-Prot, and Sophos are a few of the manufacturers you can investigate)
2. Firewall software (Zone Labs, Apple, McAfee, Microsoft are a few of the manufacturers you can investigate)
3. Ad blocking software (Microsoft, Apple, Lavasoft, AdSubtract, PanicWare, AdsGone, are a few of the manufacturers you can investigate)
4. Internet browsing software (Microsoft, Apple, Netscape, AOL, Opera are a few of the manufacturers you can investigate)
5. Spreadsheet software (Microsoft, Apple, Lotus are a few of the manufacturers you can investigate)
6. Email software (Microsoft, Apple, Lotus, Eudora are a few of the manufacturers you can investigate)

Today the internet is riddled with spyware, adware, viruses, and other irritants. Protect yourself from these by installing the appropriate protective software, and regularly, update them. Once you have a computer with internet access, you will need to open an account with an online gaming site that offers online roulette.

The following are a few of the sources listing these sites:

- <http://www.casino.com/index/index2.asp>
- <http://www.casinoguide.ws>.

There are many more casino sites on the internet. To find these, simply search for “online roulette casinos” on your internet search engine (Yahoo, Google, MSN, WebCrawler, Alltheweb, AltaVista, AOL etc).

A quick note on privacy

If you want to keep your financial transactions private, you can use an e-currency casino. These casinos accept payment via e-currencies. E-currency affords you another level of privacy and secrecy by obscuring your real name and financial details. The following are a few e-currency sites:

- e-gold (www.e-gold.com)
- e-bullion (www.e-bullion.com)
- INTGold (www.intgold.com)
- Pecunix (www.pecunix.com)
- GoldMoney (www.goldmoneyt.com)
- 1MDC (www.1mdc.com)
- Paypal (www.paypal.com)

For casinos that accept the above e-currencies, simply search for the name of the e-currency followed by casino, i.e. “e-gold casino”.

Once an e-currency account is opened, you can transfer money to your e-currency account, and anonymously use this money on the participating online casinos.
